

# THE STAR CAMPAIGN

## Charting A Bright Future

PROGRAM - Estimated Investment: \$1,250,000

**Preparing To Learn** Experience has taught us that our students' success requires equal tending to the mind, body, and spirit. Our Lasallian mission calls us to provide our students with these important conditions to learn. To that end, we must guarantee that all of our students receive:

- **Educational support**—an understanding of how they learn best in (and out of) a classroom environment
- **Emotional support**—a feeling of safety and belonging to a community
- **Nutritional support**—access for students and families to high quality meals and nutrition education

**Your support in this area of the campaign will enable us to:**

1. Establish a Learning and Student Support Center where kids will feel safe and welcomed
2. Offer students the individualized learning plans they need to succeed here, in high school, and beyond
3. Hire a chef to prepare and serve healthy meals and snacks to students out of our very own kitchen
4. Expand nutrition education and cooking classes to all students and families

BUILDING - Estimated Investment: \$2,400,000

**Creating Opportunities** San Miguel students of today and tomorrow need a safe and stimulating environment in which to learn. We seek support to help us make critical upgrades to our building to enhance safety and habitability.

**Your support in this area of the campaign will enable us to:**

- Redesign main entrance to enhance security, accessibility, and visitor experience
- Install HVAC and improved ventilation systems for all classrooms and offices
- Make much needed bathroom renovations
- Install a sprinkler system and new roof

We also seek your support in repurposing our academic spaces to more optimally support STEAM (Science, Technology, Engineering, Arts and Math) education and 21st Century learning, which would include: launching a STEAM lab, creating spaces specifically dedicated to tutoring, counseling, and small group meetings, and making necessary investments in technology and math.

SUSTAINABILITY- Estimated Investment: \$1,350,000

**Sustaining Our Community** A San Miguel education is an investment in the future. It can be said that our greatest legacy is the impact that our graduates have in their high schools, colleges, and communities. That legacy depends on our ability to continue to fund our successful Graduate Support Program.

Your gift to the **Graduate Support Sustainability Fund** will enable us to provide excellent services to our guys for high school placement, direct scholarship assistance, and college and job readiness. Over the past 10 years, our graduates have received more than 3 million dollars in school financial aid. **98% of our students graduate high school, 80% go on to post-secondary education, 80% are 'first in family' college attendees**

**Fund For Our Future** Help us build capacity to face unanticipated challenges and take advantage of future opportunities. This unrestricted fund will give San Miguel the flexibility to adapt to changing times while continuing to provide a relevant and exciting education to the Miguel Men of the future.

**San Miguel Scholarship Fund** Are you a student sponsor? What if you could reserve a spot at San Miguel for a deserving young man for many years to come? With a gift of \$250,000 you can do just that. Make a San Miguel education a reality for a young man who is full of hope. Your gift at any level will support this initiative.

# Case for Support 2020-2023
